MOSH

We've all seen this before:

```
[user@local] ~ $ ssh user@remote  
[user@remote] ~ $ foo
```

Distracted by cat gif:

```
[user@remote] ~ $ bar  
[user@remote] ~ $ Write failed: Broken Pipe
```

WHAT IS MOSH?

(Moble Shell)

As the tagline says:

“"Remote terminal application that allows roaming, supports intermittent connectivity, and provides intelligent local echo and line editing of user keystrokes."”

HTTPS://MOSH.MIT.EDU

GETTING STARTED

- » `Install mosh client locally`
- » `Install mosh client on the remotely`
